ITS TRANSMISSION OR REVE-LATION OF ITS CONTENTS TO OR RECEIPT BY AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. THE REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

50X1-HUM

- According to a decision of the Ministry of Light Industry, all Hungarian Textile factories had to make increased use of their machine capacity as from 1 April 1952. For example, machines producing plain woven cloth have now to work at 200 rpm, and those producing patterned cloth at 180 rpm.
- The Ministry has also ordered that 960 grammes of cotton yarn is to be produced from each kg. of raw cotton treated. This has led the textile factories to spin their yarn without any further ginning.
- The production of the largest Hungarian textiles factory Keltex on the Budafoki ut, Budapest, now amounts to 140,000 m. per day. Of this quantity, half is for the home market and the other half for export.
- 4. The new cotton spinning factory at Kaposvar began production in all departments on 1 May 1952. The factory is not, however, yet working at full capacity.
- 5. All work on the construction of the first cellulose factory in Hungary for the production of cellulose from straw at Jaszbereny, was suddenly suspended at the end of April 1952, without any reason being given. According to the Plan for Industry, this factory was scheduled to have started production on 1 September 1952.
